# HOSPITALITY METHODOLOGY

Capital value growth assessments are conducted across the Emirate using municipality statistics, STR, HOTSTATS and Real Estate X - Discovery data. This work is based on secondary market research and analysis of financial information available to Real Estate X at the time of the assessment. Real Estate X uses actual operating data to determine percentage changes in EBITDA, less FF&E from period to period with the assessment date being the first day of each period. Coupled with transactional evidence and forward-looking assumptions that reflect expectations of the market at the date of assessment, we assess any changes in perceived value.

Real Estate X gathers its data from sources it considers reliable; however, it does not guarantee the accuracy or completeness of the information provided. Any forward-looking information and statements contained herein are subject to various risks and uncertainties, many of which are difficult to predict and could cause actual performance to differ, other firms may also have differing opinions, projections or analysis. The information and analysis herein do not constitute advice of any kind and should not be used for investment purposes, Real Estate X, nor any of its subsidiaries or their respective officers, directors, shareholders, employees or agents accept any responsibility or liability with respect to the use of or reliance on any information or analysis contained in this document.

This work is copyright Real Estate X and may not be published, transmitted, broadcast, copied, reproduced or reprinted in whole or in part without the explicit written permission of Real Estate X and Real Estate X has no obligation to update or alter its opinions should market dynamics later change.
